

# Pick-it M-HD Camera Field of view

To be visible for Pick-it, all parts or items of interest must be inside the **field of view** (FOV) of the 3D camera.

The **region of interest** (ROI) can be seen as a 'bounding box' that fits within the FOV of the 3D camera. This box defines where the actual application takes place. You can define this ROI in the Pick-it software.

The possible dimensions of the ROI depend of the distance between the 3D camera and your ROI.

**Bringing your application closer to the camera will improve image quality and shrink the potential ROI volume.**

**Bringing your application further from the camera will lower image quality and enlarge the potential ROI volume.**

REGION OF INTEREST (ROI)  
EXAMPLE APPLICATIONS

## CAMERA TECHNICAL SPECIFICATIONS

<b>3D measurement method</b>	Structured light
<b>Image processing speed</b>	≥10 Hz (100ms snapshots)
<b>3D Camera accuracy</b>	0.1mm
<b>3D Camera repeatability</b>	< 1mm
<b>3D camera weight</b>	2 kg
<b>3D camera connection to PC</b>	M12-8 (USB) - USB3
<b>PC connection to robot</b>	TCP/IP over Ethernet
<b>Power supply</b>	M12-5 24VDC
<b>Temperature</b>	10°C to 40°C
<b>IP rating</b>	IP65
<b>Vibrations</b>	5G Sinus, 25G Shock
<b>Conforms to</b>	CE, CB, EN6950, FCC class A

## CAMERA CABLE TECHNICAL SPECIFICATIONS

5m

### Industrial M12 camera connector

#### High-Flex / Continuous-Flex

- Type-U (R= 67,5mm - 5.000.000 times)
- Type-S (R= 60mm - 1.000.000 times)
- 90° Tick-Tock bending (R= 60mm - 1.000.000 times)

## PROCESSOR

### Power consumption

- While turned off: 25W
- Booting: 115W
- Idle: 70W
- Heavy processing: 160W

### Technical specifications

- Processor: 6 cores (12 threads) at 3.7 Ghz
- 19 inch server: rack compatible (2U)
- Temperature: -20°C to 70°C
- Vibrations: Operating, 5 Grms, 5-500 Hz, 3 axes
- IP rating: IP54
- Power supply: 9-32V DC 160W
- Humidity: -95% @ 40°C (non-condensing)

# Ball Joint Tension

Adjust the 4 tensioning bolts as indicated at the right to alter the ball joint tightness and obtain a fixed joint or a flexible joint depending your application and needs.

## 4 MOUNTING BOLTS

Use the 4 mounting bolts to attach the mounting plate to the Pick-it M-HD camera. Tighten them following the x-pattern, as indicated by the numbers in the figure left, until the recommended tension (2Nm) is reached per bolt.

## 4 TENSIONING BOLTS

ALLEN KEY  
HEXAGONAL SIZE

### Nominal Bolt Tension Guidelines

- Fixed joint (immobilized) = 2 Nm
- Flexible joint (mobile) = 0,75 Nm

Gradually adjust the tensioning bolts of the ball joint in small steps, following the x-pattern, as indicated by the numbers in the figure left, until the recommended tension is reached per bolt.

Follow the nominal bolt tension guidelines when adjusting the tensioning bolts of the ball joint to alter the joint's clamping force.

# Stationary Mounting

SOFTWARE SUPPORTS ON-ROBOT MOUNTING AND STATIONARY MOUNTING

Profile type shown above is for illustrative purposes only. A wide range of profile types is supported by the L-bracket. Contact us for further info.
